

LONGO

LINE TO LOAD

SWITCHGEAR

Above; faulty switchgear explosion. The Longo Servicenter is set up to handle switchgear, circuit breakers and transformer service, as well as the "plug and play" replacement units.

Switchgear testing, repair and replacement up to 6000 amps and 35kv

Without testing, switchgear is a dangerous unknown. Failure to trip can be catastrophic in loss of equipment, production and even loss of life. Once a defect is found Longo is able to recondition the unit to like new condition.

Longo's extensive experience in the testing, repair and replacement of switchgear is a step above. To begin with, Longo has the expertise to tackle the repair of "older dinosaurs" from sourcing impossible to find parts

through reverse engineering parts and components. Our technicians have repaired most every type of switchgear still operating. When a repair is no longer possible we have access to the best "plug and play" units designed and built to literally slide into replace older worn out units.

Hurricane Sandy put us to the test by having us remove and repair over 250 units from one customer alone.
